

30-Tube Standard Solar Water Heater

SWHG450-30

Large Gravity-Type Evacuated-Tube Solar Water Heater

The SWHG450-30 uses 30 evacuated glass tubes measuring 58 mm × 1,800 mm to provide increased solar collection area. Heated water circulates naturally into the integrated storage tank, creating a large gravity-type solar hot-water system without a circulation pump.

Applications

Suitable for large villas, farms, hotels, schools, restaurants, workshops and commercial facilities requiring substantial daily hot-water production.
